HBC

Model name			CMB-WM108V-AA										
Number of branch			8										
Power source			1-phase 220-230-240 V										
			50 Hz		60 Hz								
Power input (220-230-240)	Cooling	kW	0.45-0.46-0.47		0.45-0.46-0.47								
	Heating	kW	0.45-0.46-0.47		0.45-0.46-0.47								
Current input (220-230-240)	Cooling	A	2.89-2.83-2.79		2.89-2.83-2.79								
	Heating	A	2.89-2.83-2.79		2.89-2.83-2.79								
Sound pressure level (measured in anechoic room)			dB <A>		41								
Applicable temperature range of installation site			°C (D.B.)		0~32								
External finish			Galvanized steel plate (Drain pan: Pre-coated galvanized sheets + powder coating)										
Connectable outdoor/heat source unit capacity			PURY-(E)M200~500YNW-A1, PURY-(E)M200~300YNW-A PURY-(E)P200~500YNW, PURY-(E)P200~500YLM-A1 PURY-P200~450YLM-A, PQRY-P200~500YLM-A1/A2										
Indoor unit capacity connectable to 1 branch			Model W/WP/WL80 or smaller (Use optional joint pipe combining 2 branches when the total unit capacity exceeds W/WP/WL80.)										
External dimension H x W x D			mm	300 x 1,520 x 630									
			in.	11-13/16 x 59-7/8 x 24-13/16									
Refrigerant piping diameter	To outdoor/heat source unit			Connectable outdoor/heat source unit capacity									
	P200/P400/ M200/M400	M250/M300/ M450/M500	M350	P250/P300/P450/ P500	P350								
	High press. Pipe		mm (in.) O.D.	15.88 (5/8) Brazed	15.88 (5/8) Brazed	15.88 (5/8) Brazed	19.05 (3/4) Brazed						
	Low press. Pipe		mm (in.) O.D.	19.05 (3/4) Brazed	22.2 (7/8) Brazed	28.58 (1-1/8) Brazed	28.58 (1-1/8) Brazed						
Water piping diameter (To Sub-HBC)	Connection size	Inlet	mm O.D.	15.88 (5/8) Brazed									
		Outlet	mm O.D.	22									
	Field pipe size	Inlet	mm I.D.	20									
		Outlet	mm I.D.	20									
Water piping diameter (To Indoor unit)			W/WP/WL10-50			W/WP/WL51-125							
	Connection size	Inlet	mm O.D.	22		22							
		Outlet	mm O.D.	22		22							
	Field pipe size	Inlet	mm I.D.	20		30							
		Outlet	mm I.D.	20		30							
Field drain pipe size			mm (in.)	O.D. 32 (1-1/4)									
Net weight			kg (lbs)	86 (190) [96 (212) with water]									
Standard attachment	Document			-									
	Accessories			Drain Connection pipe (with flexible hose and insulation)									
Optional parts			-										
Note	<p>1. Installation/foundation work, electrical connection work, duct work, insulation work, power source switch, and other items shall be referred to the Installation Manual.</p> <p>2. This unit is for R410A or R32 refrigerant.</p> <p>3. Install this unit in a location where noise (refrigerant noise) emitted by the unit will not disturb the neighbors. (For use in quiet environments with low background noise, position the HBC at least 5 m away from any indoor units.)</p> <p>4. Please install the HBC in a place where noise will not be an issue.</p> <p>5. Please attach an expansion vessel (field supply).</p> <p>6. Please use copper or plastic pipes for the water circuit. Do not use steel or stainless steel pipework. Furthermore, when using copper pipe-work use a non-oxidative brazing method. Oxidation of the pipe-work will reduce the pump life.</p> <p>7. When brazing the pipes, be sure to braze, after covering a wet cloth to the insulation pipes of the units in order to prevent it from burning and shrinking by heat.</p> <p>8. Please install an air purge valve where air will gather in the water circuit.</p> <p>9. Please install a pressure reducing valve and a strainer on the water supply to the HBC.</p> <p>10. Please refer to the DATA BOOK or the Installation Manual for the specified water quality.</p> <p>11. This unit is not designed for outside installations.</p> <p>12. Please always make water circulate or pull out the circulation water completely when not using it. *Please do not use it as a drinking water.</p> <p>13. Please do not use ground water and well water.</p> <p>14. When installing the HBC in an environment which may drop below 0 °C, please add antifreeze liquid to the circulating water. (Refer to the DATA BOOK and the Installation Manual).</p> <p>15. R32 is flammable, and certain restrictions apply to the installation of units. When installing new units, moving the existing units, or changing the layout of the room, ensure that installation restrictions are observed. For detail, refer to the section in the DATA BOOK on installation restrictions.</p>

Optional parts	-										

Notes:

1. Installation/foundation work, electrical connection work, duct work, insulation work, power source switch, and other items shall be referred to the Installation Manual.
2. This unit is for R32 refrigerant.
3. Install this unit in a location where noise (refrigerant noise) emitted by the unit will not disturb the neighbors.  
(For use in quiet environments with low background noise, position the HBC at least 5 m away from any indoor units.)
4. Please install the HBC in a place where noise will not be an issue.
5. Please attach an expansion vessel (field supply).
6. Please use copper or plastic pipes for the water circuit. Do not use steel or stainless steel pipework.  
Furthermore, when using copper pipe-work use a non-oxidative brazing method.  
Oxidation of the pipe-work will reduce the pump life.
7. When brazing the pipes, be sure to braze, after covering a wet cloth to the insulation pipes of the units in order to prevent it from burning and shrinking by heat.
8. Please install an air purge valve where air will gather in the water circuit.
9. Please install a pressure reducing valve and a strainer on the water supply to the HBC.
10. Please refer to the DATA BOOK or the Installation Manual for the specified water quality.
11. This unit is not designed for outside installations.
12. Please always make water circulate or pull out the circulation water completely when not using it.  
\*Please do not use it as a drinking water.
13. Please do not use ground water and well water.
14. When installing the HBC in an environment which may drop below 0°C, please add antifreeze liquid to the circulating water. (Refer to the DATA BOOK and the Installation Manual).
15. R32 is flammable, and certain restrictions apply to the installation of units.  
When installing new units, moving the existing units, or changing the layout of the room, ensure that installation restrictions are observed.  
For detail, refer to the section in the DATA BOOK on installation restrictions.

Field drain pipe size			mm (in.)	O.D. 32 (1-1/4)			
Net weight			kg (lbs)	53 (117) [62 (137) with water]			
Standard attachment	Document	-					
	Accessories	Drain Connection pipe, Washer, Tie band					
Optional parts							

Notes:

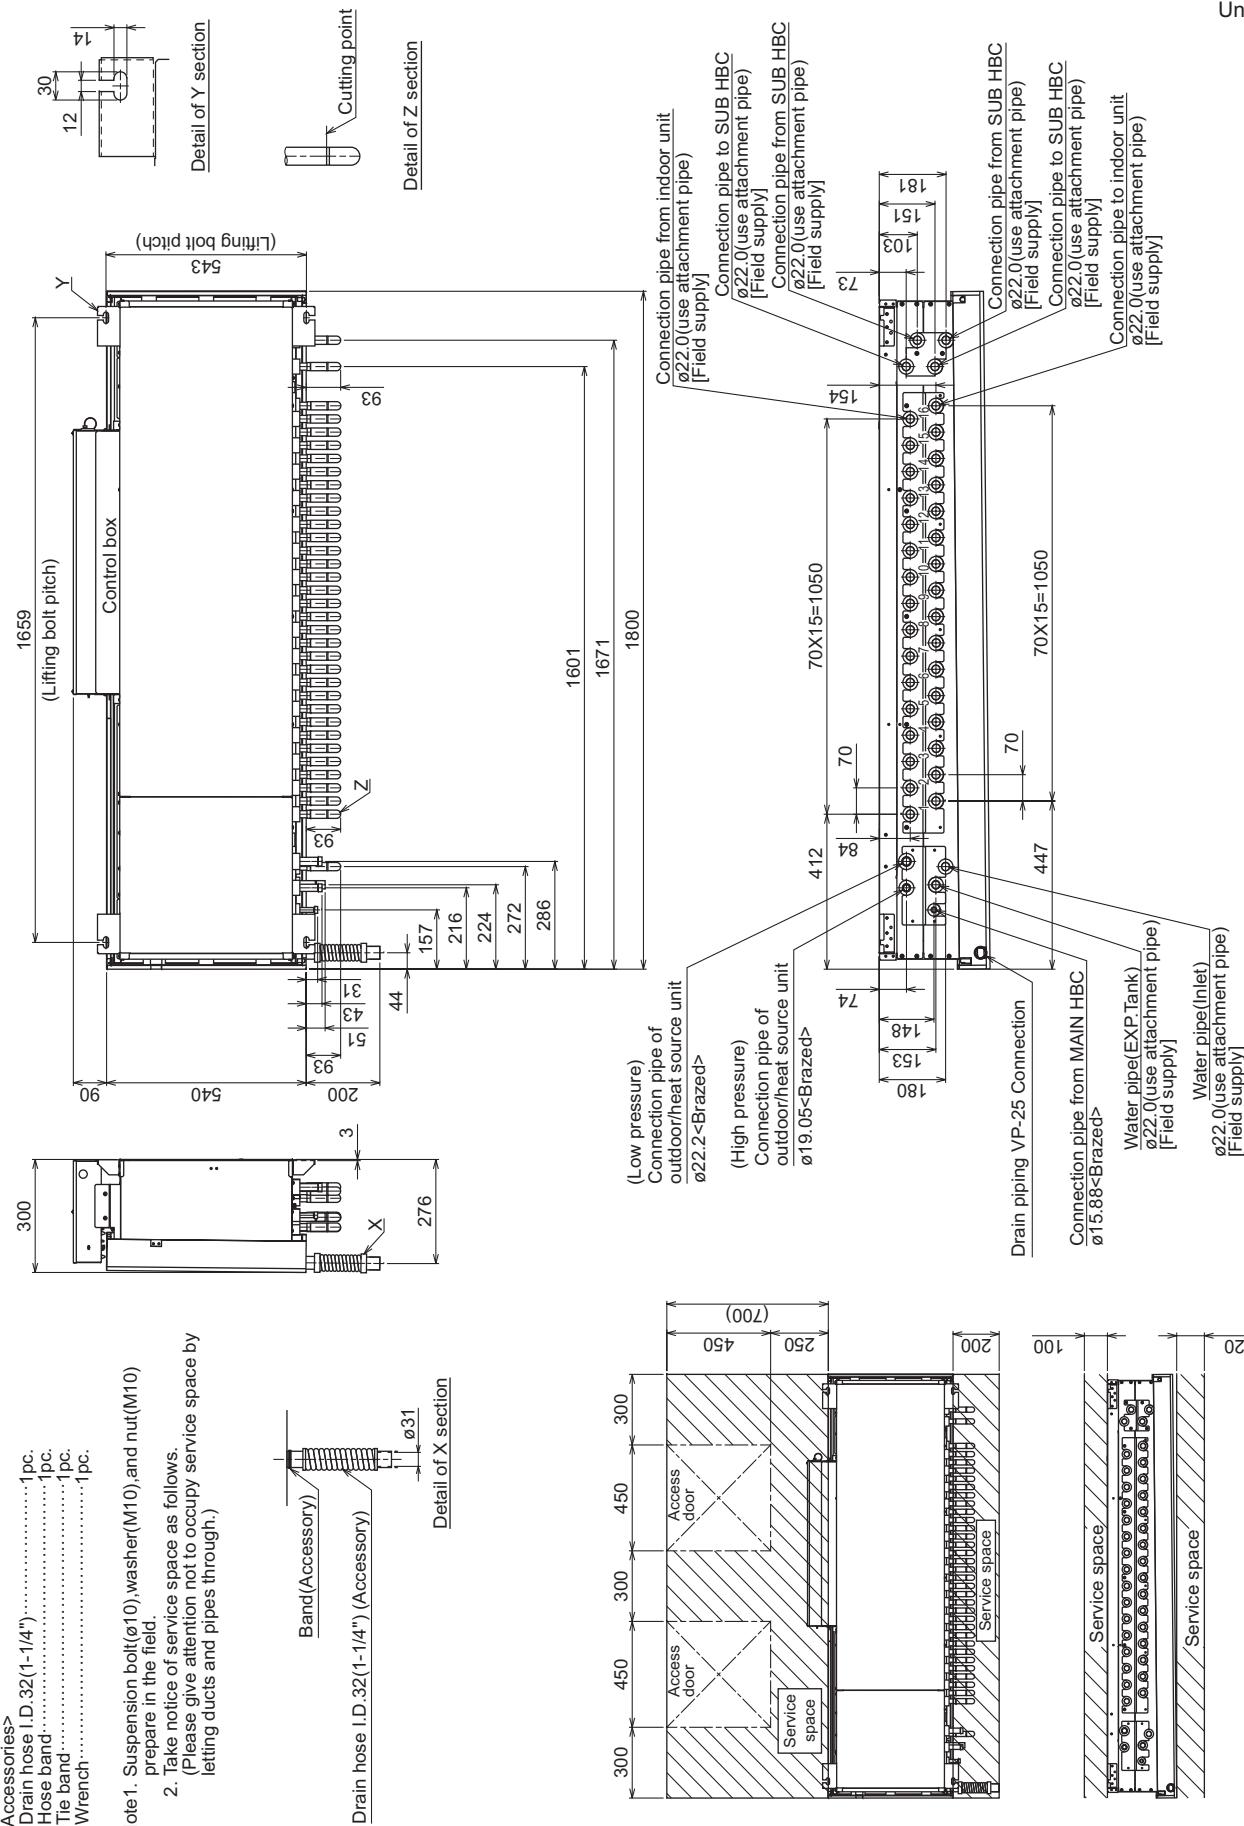

- Installation/foundation work, electrical connection work, duct work, insulation work, power source switch, and other items shall be referred to the Installation Manual.
- This unit is for water.
- Install this unit in a location where noise (refrigerant noise) emitted by the unit will not disturb the neighbors.  
(For use in quiet environments with low background noise, position the Sub-HBC at least 5 m away from any indoor units.)
- Please install the Sub-HBC in a place where noise will not be an issue.
- Please attach an expansion vessel (field supply).
- Please use copper or plastic pipes for the water circuit. Do not use steel or stainless steel pipework.  
Furthermore, when using copper pipe-work use a non-oxidative brazing method.  
Oxidation of the pipe-work will reduce the pump life.
- When brazing the pipes, be sure to braze, after covering a wet cloth to the insulation pipes of the units in order to prevent it from burning and shrinking by heat.
- Please install an air purge valve where air will gather in the water circuit.
- Please refer to the DATA BOOK or the Installation Manual for the specified water quality.
- This unit is not designed for outside installations.
- Please always make water circulate or pull out the circulation water completely when not using it.  
\*Please do not use it as a drinking water.
- Please do not use ground water and well water.
- When installing Sub-HBC in an environment which may drop below 0°C, please add antifreeze liquid to the circulating water. (Refer to the DATA BOOK and the Installation Manual).
- Can't use singleness. (Main-HBC is necessary)

Fig.B

Note1. Take notice of service space as Fig.A.  
(Please give attention not to occupy service space by letting pipes through.)

2.By changing the direction of the drain pan, it is possible to connect the drain pipe from the back side.  
In case of removing the drain pan after the unit is installed, please secure a service space of 450 mm to the left and right sides.  
Refer to the Installation Manual for changing the direction of the drain pan.

3.Maintenance is possible only from the front, however the serviceability can be improved by securing a service space of 450mm on the left, right and back side and removing the panels.  
4.It is also possible to hold the unit as shown in Fig. B and Fig. C.  
Refer to the Installation Manual for holding the unit.

5.Refer to the DATA BOOK about connection pipe and drain pipe diameter size.  
6.Refer to the Installation Manual about the specification for connection pipe and drain pipe insulation.

**⚠ Warning**

- Do not use refrigerant other than the type indicated in the manuals provided with the unit and on the nameplate.
  - Doing so may cause the unit or pipes to burst, or result in explosion or fire during use, repair, or at the time of disposal of the unit.
  - It may also be in violation of applicable laws.
- MITSUBISHI ELECTRIC CORPORATION cannot be held responsible for malfunctions or accidents resulting from the use of the wrong type of refrigerant.
- Our air conditioning equipment and heat pumps contain a fluorinated greenhouse gas, R410A/R32.
